

An Association of Values

Since its establishment in 1959, the California Pork Producers Association has aimed to keep its members informed on the numerous issues and changes taking place within their industry.

Through educational seminars, youth activities, livestock shows and by working cooperatively with the National Pork Check-off, the California Pork Producers Association has been able to provide its members with a great deal of information and expertise in all areas of production.

In addition to providing our members with educational opportunities, CPPA also aims to educate the general public about the California swine industry as well as promotes the sale of pork.

Regardless of the size of your swine operation or your level of involvement within the industry, membership with CPPA can be a great asset to you. CPPA strives to provide all members with up to date information on local, state and national issues through our bi-monthly newsletters, as well as be the voice for California pork producers on a state and national level.

Your industry is being represented on a local, state and national level.
Be part of the united voice...

NATIONAL PORK BOARD

The mission of the National Pork Board is to generate added value to the U.S. Pork production industry by creating and executing forward-looking promotion, research and consumer information programs based on principles reflecting its investors commitment to quality, innovation and stewardship.

Checkoff Vision Producers will recognize the Pork Checkoff as an effective investment to:

- Increase domestic per capita demand for pork
- Increase export demand for U.S. pork.
- Establish science-based standards from which the pork production industry may be fairly measured.
- Provide knowledge and opportunities that allow producers to be competitive.

Today's Pork Checkoff is at work for pork producers by investing the mandatory assessment required by federal law of \$0.40 per \$100 of value when pigs are sold and when pigs or pork products are brought into the U.S.

NATIONAL PORK PRODUCERS COUNCIL

NPPC conducts public policy outreach on behalf of its 44 affiliated state association members - enhancing opportunities for the success of U.S. pork producers and other industry stakeholders by establishing the U.S. pork industry as a consistent and responsible supplier of high quality pork to the domestic and world market.

As the pork industry changes in scope and complexity, the challenge to pork producers is to adapt and continue to be profitable. NPPC is meeting those challenges through a series of strategic programs designed to address issues affecting pork from production to demand.

NPPC collects the voluntary assessment titled Strategic Investment Program (SIP) set at 0.10 per \$100 in value. This contribution is used by the NPPC and the CPPA to fund their public policy advocacy and regulatory affairs programs for the pork industry.
